

Maicon Engineering is pleased to announce its award of the Onshore and Offshore Spool Fabrication contract by Technip Oceania for the Shell Prelude Floating Liquefied Natural Gas (FLNG) project.

The scope of work involves:

- Fabrication of spools from exotic materials, including duplex and titanium
- Fabrication of general items for connection of the Shell Prelude FLNG platform to the sub-sea risers on the sea floor.

The works will be carried out in accordance with onshore fabrication and offshore installation schedule requirements.

This contract will be managed and delivered out of our Darwin facility and builds on our track record as a quality and reliable contractor to the resource sector. We look forward to working closely with Technip Oceania on this FLNG project.

NT Minister for Primary Industry and Resources Ken Vowles said: "Congratulations to Maicon on being awarded the Technip Oceania Onshore and Offshore Spool Fabrication for Shell Prelude.

This contract is testimony that NT based SME's are capable of working on world class projects such as the Shell Prelude Floating FLNG Project".
